Profile

I am a 3rd-year Bachelor of Engineering student at Ecole Centrale Casablanca, passionate about computer science and web/mobile development. I am familiar with popular frameworks like React, Next.js, and React Native, and I have already worked on projects involving REST APIs and LLMs.

Technical Skills

Languages	: JavaScript, python, Java, HTML, CSS
Frameworks	: React.js, Next.js, Express, Node.js
FulStack	: Responsive UI design & component architecture, API design & integration, Database management
AI / Data	: LLM integration, prompt engineering, document analysis with AI
Databases	: MongoDB, MySQL
Dev Tools	: Visual Studio Code, Git, Google Coolab

Experience

Full stack Web Developer intern <i>Ahiyoyo</i>	June 2025 – August 2025 <i>Cotonou, Benin</i>
- Contributed to the development of a React web application for a logistics startup using HTML, CSS, JavaScript, and node - Worked with REST APIs to retrieve and display data from databases - Improved user experience through implementation of a user dashboard - Gained hands-on professional experience in a production environment	

Education

Ecole Centrale Casablanca <i>Bachelor of Engineering</i>	Bouskoura, Casablanca, Morroco <i>October 2023 – July 2027</i>
--	---

Projects

Quantara	Next.js, Node.js, Express, JavaScript, Git, Groq Api
- An AI-powered full-stack web application that analyze corporate financial reports using large language models - Detect inconsistencies between executive statements and actual financial figures	
InnoFaso Sanitary Mapping	JavaScript, JSON, SQL, Figma, IoT Sensors
- Developed a dynamic risk visualization system using a color-coded interactive map - Engineered an automated data pipeline to transform unstructured laboratory reports into a centralized database via JSON mapping - Integrated IoT environmental sensors and Designed a dual-user interface for operators and supervisors	
Sahelian Flood Forecasting	Python, LSTM, XGBoost, Random Forest, Caravan Dataset, NetCDF
- Developed a predictive hydrological model for the Sahelian and West African context to forecast river discharge with a 24-72h lead time - Designed an early warning dashboard that visualizes predicted flows against critical flood thresholds	

Certifications

- [HTML, CSS, and Javascript for Web Developers](#)
- [Software Engineering: Modeling Software Systems](#)
- [Agile Project Management](#)
